

# RLE

Technologies

[www.rletech.com](http://www.rletech.com)

## TRIAD

Patented Slotted & Chamfer raised floor panels direct airflow where it's needed most.

Complete raised floor and containment solutions customized for your facility.

Raised Floors & Airflow

## SEAHAWK

Leak detection systems pinpoint small fluid leaks before they become major disasters.

Over 16 million feet of patented leak detection cable in service globally.

Leak Detection

## FALCON

Wired and wireless systems monitor facilities for changes in temperature, humidity, & more.

Facilities worldwide trust our WiNG wireless platform to monitor their environments.

Facility Monitoring

## RAPTOR

Leverage protocol communications to integrate equipment into BMS and other automation systems.

Raptor products also simplify protocol translation and alarm annunciation.

System Integration

With more than 35 years in the industry, RLE engineers and manufactures reliable, quality products and services that prevent disasters, preserve our clients' reputations, and provide peace of mind.

RLE products are proudly made in the USA.

# Raised Floors & Airflow, Leak Detection, Facilities Monitoring, & Network Integration Solutions

## TRIAD

Our airflow specialists have designed solutions for data centers around the globe. From raised floor panels and intelligent air movers, to server rack blanking panels and underfloor plenum panels, our complete product portfolio allows us to work with you and the specific parameters of your facility to create a solution that addresses all your airflow needs.

## SEAHAWK

Engineered to provide unparalleled protection against any form of conductive fluid that might threaten your facility. The line includes fluid sensing cable and spot detectors as well as the monitoring devices and accessories to support them.

## FALCON

Facilities Monitoring Systems provide facility managers with complete peace of mind against environmental threats such as temperature, humidity, fluid leaks, pressure, airflow, smoke, and much more.

## RAPTOR

Integration Solutions ensure that all your systems work together seamlessly. If you would like to integrate equipment and sensors into current building automation and monitoring systems, Raptor products will simplify protocol translation and alarm annunciation.
