

Monitor. Integrate. Alert. Peace of Mind.

Applications

Steel panels are designed to fit into new or existing raised floor systems. With load ratings up to 5,000 pounds, they're ideal for environments with heavy concentrated weights or rolling loads.

Key Features

- o Build in levelers allow you to adjust each corner of the panel independently, so you ensure your floor is level.
- o Available in both Imperial and Metric Sizes
- o Available in a Grey Flek or Crystal White powder coat finish

Patented Airflow Solutions For Every Facility

Solid steel panel with built-in handles and levelers; available in a variety of weight ratings.

What Sets RLE's Steel Panel Apart?

- o **Patented Integrated Dual Handles** make lifting and moving panels fast, safe, and easy
- o **Load rating up to 5,000 pounds** as proven through robust testing
- o **Built-in vertical and horizontal levelers** allow you to achieve an even floor in even the most challenging retrofit and aging floor system scenarios.
- o **Steel panels are made in the USA** and include a Grey Flek or Crystal White powder coat finish

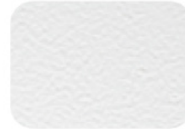

Steel Panel • Compatible with all new and existing raised floor systems
