

ANNOUNCEMENT

PARAMETER (RLE) WiNG-MGR V1 WIRELESS GATEWAYS SUPERSEDED BY WiNG-MGR-V2**ANNOUNCING PRODUCT DISCONTINUANCE OF WiNG-MGR, WiNG-MGR-865, WiNG-MGR-868****December 10, 2025**

We are in the process of discontinuing all Parameter (RLE) **WiNG-MGR v1 wireless gateways** (865, 868 and 900MHz).

The **WiNG-MGR-v2 wireless gateways** (865, 868 and 900MHz) will continue to be offered and you should order those instead. The v2 wireless gateways have all the features of the v1 models and are compatible with all WiNG sensors and WiNG-MGR-RXT. The v2 gateways also add these features:

- DeltaView Mapping (web-based map of sensors with alert status)
- HTTPS support
- TLS encryption

We launched the **WiNG-MGR-v2 wireless gateways** with the intent to replace the v1 gateways. We are now proceeding with that product transition.

Here is the timing for discontinuance of the WiNG-MGR v1 wireless gateways:

Product	Status	Replaced By
WiNG-MGR-868 (v1)	Discontinued now.	WiNG-MGR-868 v2
WiNG-MGR (v1)	These products will be discontinued over the next few months when supply is exhausted (likely between March and June 2026).	WiNG-MGR v2
WiNG-MGR-865 (v1)		WiNG-MGR-865 v2

All of these products continue to be offered and are not impacted by this discontinuance of v1 wireless gateways:

- **WiNG-MGR-v2 wireless gateways** (865, 868 and 900MHz)
- WiNG-MGR-RXT
- All WiNG-* sensors
- All WiFi-* sensors

Please contact Parameter sales or your channel partner to **order last time quantities** of the **WiNG-MGR** and **WiNG-MGR-865 wireless gateways**.

Thank you for your valued business,

Parameter Product Team
